

# Student Feedback Report

Jun 19, 2023

## Overview

The following report contains descriptive statistics, data visualizations, and qualitative feedback from students in your EDPS-459-001 class. Students were asked to respond to **nine questions** regarding the degree to which they believe aspects of your classroom to be successful. These data were collected via a secure Qualtrics link. The following pages of feedback are separated by these aspects. Below are additional technical properties of this report.

**Survey Items** Each item stem begins with the phrase “*My instructor..*” but differ depending on the element of their classroom experience. The student classroom experience was captured using the following domains:

- Clarity of purpose of class and class activities
- Explanation of class materials
- Extent to which atmosphere encourages learning
- Student excitement and interest in content
- Mutual respect and relation to students
- Explanation of class expectations
- Clarity of performance evaluation
- Degree of match between learning evaluations and course goals
- How meaningful instructor feedback is to students

**Response Scale** The five-point scale starts at *Strongly disagree* to *Strongly agree* with a neutral point, *Neither agree nor disagree*, in the middle. Below are how these responses were coded numerically.

Strongly disagree	Somewhat disagree	Neither agree nor disagree	Somewhat agree	Strongly agree
1	2	3	4	5

Additionally, space was given to students to explain their feedback in words. This text will follow each each question below.
